2012 - フィンカ・リンテ

商品番号 00225-12

スペイン, ナバーラ州, DO

ボデガス・マカヤ S.、ララーガ

色	赤	スタイル	辛口	ボディ	ミディアム ~ フルボディ
アルコール	13.0 %	容量	750 ml	熟成度	今飲み頃/保管
ブドウ	テンブラニーリョ				

テイastingノート

色調は明るめのルビー色、縁はピンク色。新鮮なレッドカラント、ザクロなどの赤系果実、ブラックチェリー、鉄分などが調和した、若々しい香り。なめらかなアタック、心地よいみずみずしい酸味、低めのタンニン、とてもスムーズな味わい。後味もさわやかな、チャーミングで果実味あふれる赤ワイン。

Bodegas Macaya S., Larraga

Color	Red	Style	Dry	Body	Medium ~ Full
Alcohol	13.5 %	Volume	750 ml	Maturity	Drink or Hold
Grapes	Cabernet Sauvignon, Tempranillo				

Bodegas Macaya S., Larraga

Bodegas Macaya is located in the very heart of Navarra, in the Ribera Alta sub-region. Vine growing in the area dates back to the 2nd century BC when the Romans grew vines in the region. In the middle Ages, when Navarra was a powerful kingdom with close ties to France, viticulture prospered and wines were exported abroad. During the late 18th century viticulture was the main agricultural activity. In 1892 the phylloxera plague devastated almost all vineyards in the region. It took until the 20th century before viticulture again became an important part of the region's agriculture. Since then the region has made big strides and is now one of Spain's most sought after quality wine producing region.

The Macaya family created the estate and bought the winery in 1999. That sounds like a rather recent development were it not for the fact that Lorenzo Macaya Nieto had, in 1960, established a vine nursery which, by now, has become Spain's leading company in this field. Thus growing vines and wine making has always been part of the family's life. They planted their best vines in the vineyards and equipped the winery with the most modern equipment. By now most of their vines are over 20 years, the perfect age to produce high quality wines.

The vineyards are equipped with a drip irrigation system which regulates minimum water supply. The soil, mainly made up of clay, contain calcium carbonate from underlying chalk or limestone rock. The climate is continental (long, hot and dry summers and cold winters). The microclimate provides optimal growing and ripening conditions with a rainfall of about 650 mm and important thermal differences in day and night temperature. Grapes ripen slowly and fully and retain acidic and aromatic components to produce great wines.
